SUMMARY

Full-Stack Web Developer with 12+ years of experience in backend and full-stack web development: a SaaS test management system (testomat.io), a SIP / call-tracking analytics platform (istat24.com), and multiple e-commerce projects. Core stack: Ruby on Rails (MariaDB/MySQL, PostgreSQL, Redis, ClickHouse, Meilisearch) with Ember.js and React.js frontends; production experience with Python and Django. Strong background in database architecture and optimization: split a 380 GB PostgreSQL database into 2,000+ MariaDB instances with a 100-150x performance gain, set up master-slave replication. Experienced in DevOps (Docker, Nginx, Capistrano, GitHub/GitLab CI/CD) and Atlassian Jira plugin development (React.js inside iframe). Set up local AI agents and integrated AI tooling into team development workflows.

SKILLS

Web Frameworks: Ruby on Rails (Capistrano 3), Django, Codelgniter 4

Frontend: Ember.js, React.js (Jira plugins), TailwindCSS, Bootstrap 3-5, jQuery, HTML/CSS

Databases: MariaDB/MySQL, PostgreSQL, Redis, ClickHouse, Meilisearch, MongoDB, SQLite

DevOps: Docker, Nginx (reverse proxy, Let's Encrypt), GitHub Actions CI, GitLab CI/CD, SSH, Linux (tmux, cron, bash)

AI Tooling: opencode CLI agent in Docker (Chrome DevTools and GitHub tools connected), ChatGPT, DeepSeek, Ollama

Other Languages: Perl, Crystal, PHP, C++ (Arduino, STM32/GCC), Pascal (Delphi 7, RAD XE)

Languages: English (B2), Ukrainian, Russian

EXPERIENCE

testomat.io

Full-Stack Web Developer | 2022 - Present | Ukraine (remote)

Project: app.testomat.io - SaaS test management system (test cases, test runs, reports, integrations).

Stack: Ruby on Rails, MariaDB/MySQL, Redis, ClickHouse, Meilisearch, Ember.js, TailwindCSS, React.js (Jira plugin), Python/Django.

- Develop and support the core SaaS application: Ruby on Rails backend and Ember.js frontend.
- Implemented a dual-mode authorization system for the Testomat Jira plugin (React.js inside an Atlassian iframe): when cookies are supported the plugin uses session cookies; when cookies are blocked in the iframe it stores the authorization data inside Jira (user properties) via the Jira REST API and then pulls it back over the API - the login flow works reliably in both modes.
- Built analytics for test runs and a test-run configurator.
- Developed internal tooling and supporting services with Python and Django.
- Set up local AI coding agents (OpenCode CLI running in Docker, with browser and GitHub tools connected), integrated AI-assisted development into the team's workflows and tooling, and configured Ollama with Open WebUI for code testing, codebase analysis, and deep security vulnerability scanning.

vint.com.ua team (istat24.com)

Web Developer (Full-Stack) | 2014 - 2022 | Ukraine

1. istat24.com - SIP telephony and call-tracking analytics platform.

Stack: Ruby on Rails, PostgreSQL, MariaDB, Nginx, AWS, Bootstrap.

- Split a 380 GB PostgreSQL database into 2,000+ small MariaDB databases - analytics performance improved 100-150x.

2. vint.com.ua, patisson-toys.com.ua, pacman.com.ua - e-commerce shops.

Stack: Perl, Crystal, MariaDB, Nginx, Bootstrap.

- Set up MariaDB master-slave replication for load distribution and fault tolerance.

3. test.vint.com.ua - new frontend for vint.com.ua.

Stack: Crystal, MariaDB, Nginx, jQuery.

4. svc-power.com.ua - online shop.

Stack: PHP (CodeIgniter 4), MariaDB, jQuery.

Freelance (Elance, Upwork)

Software Developer | 2003 - 2014 | remote

Stack: Pascal (Delphi 7, Kylix, Lazarus), C++ (C++Builder 6, Arduino), PHP, C#, Perl.

- Developed a patch for the OpenTracker firmware: automatic switching between multiple SIM cards.
- Developed a patch for the Marlin 3D-printer firmware: automatic print-bed position adaptation.

DEMO PROJECT

testogit.trumenov.top - personal demo site built with Django (Python).

EDUCATION

Bachelor's Degree in Automated Systems

Kyryvi Rih National University (KNU), Ukraine | 2010 - 2014
